)	

O R D E R

On March 29, 2000, Crown Communication Inc. ("Crown"), as ultimate owner, and Tritel Communications, Inc. and Tritel Finance, Inc. ("Tritel") (collectively, the "Applicants") filed an application seeking a Certificate of Public Convenience and Necessity to construct and operate a wireless telecommunications facility. The proposed facility consists of a guyed antenna tower not to exceed 375 feet in height, with attached antennas, to be located at 4480 Highway 511, Rockholds, Whitley County, Kentucky. The coordinates for the proposed facility are North Latitude 36° 50' 41.36" by West Longitude 84° 9' 27.84". Crown has requested authorization to construct a cell site in Whitley County, and Tritel has provided evidence that the public convenience and necessity will be served by the proposed construction.

The Applicants have provided information regarding the structure of the tower, safety measures, and antenna design criteria for the proposed facility. Based upon the

application, the design of the tower and foundation conforms to applicable nationally recognized building standards, and the plans have been certified by a Licensed Professional Engineer.

Pursuant to 807 KAR 5:063, the Applicants have notified the County Judge/Executive of the proposed construction. The Applicants have filed applications with the Federal Aviation Administration ("FAA") and the Kentucky Airport Zoning Commission ("KAZC") seeking approval for the construction and operation of the proposed facility. Both applications have been approved.

The Applicants have filed evidence of the appropriate notices provided pursuant to 807 KAR 5:063. The notices solicited any comments and informed the recipients of their right to request intervention. To date, no public comments have been filed with the Commission.

Pursuant to KRS 278.280, the Commission is required to determine proper practices to be observed when it finds, upon complaint or on its own motion, that the facilities of any utility subject to its jurisdiction are unreasonable, unsafe, improper, or insufficient. To assist the Commission in its efforts to comply with this mandate, the Applicants should notify the Commission if they do not use this antenna tower to provide service in the manner set out in their application and this Order. Upon receipt of such notice, the Commission may, on its own motion, institute proceedings to consider the proper practices, including removal of the unused antenna tower, which should be observed by the Applicants.

The Commission, having considered the evidence of record and being otherwise sufficiently advised, finds that the Applicants have demonstrated that a facility is

necessary to provide adequate utility service and therefore should be granted a Certificate of Public Convenience and Necessity to construct the proposed facility.

IT IS THEREFORE ORDERED that:

1. The Applicants are granted a Certificate of Public Convenience and Necessity to construct a wireless telecommunications facility. The proposed facility consists of a guyed antenna tower not to exceed 375 feet in height, with attached antennas, and is to be located at 4480 Highway 511, Rockholds, Whitley County, Kentucky. The coordinates for the proposed facility are North Latitude 36° 50' 41.36" by West Longitude 84° 9' 27.84".

2. The Applicants shall immediately notify the Commission in writing, if, after the antenna tower is built and utility service is commenced, the tower is not used for a period of 3 months in the manner authorized by this Order.

Done at Frankfort, Kentucky, this 25th day of May, 2000.

By the Commission
